Experience

MERN Stack Developer (Internship)

Neuro Spark Works Solutions, Pune

Sep 2023 - Dec 2023

- Designed and implemented a dynamic and user-friendly Saved Address page utilizing React.js and React-Bootstrap.
- Developed a responsive carousel component using React-Bootstrap for an enhanced user experience on the Saved Address page.
- Implemented client-side logic for interacting with the backend to retrieve and display saved addresses.
- Utilized Express.js to build robust and scalable RESTful APIs to handle CRUD operations for managing saved addresses.
- Integrated the backend with a MySQL database to store and retrieve address data efficiently.
- Acquired proficiency in Python programming language through self-study.
- Created a custom Python script to parse and convert XML files into Excel spreadsheets.

Project Work
